Coronavirus / COVID-19	Malaria
<i>E. coli</i>	Meningitis
Gastroenteritis	Osteomyelitis
Hepatitis A / B / C / E	Q fever
Legionnaires' disease	Sepsis
Leptospirosis	TB / tuberculosis

My personal profile

I am a UK-trained physician and a Consultant in Public Health Medicine. I qualified as a consultant in 1995. I then worked for 19 years as full-time consultant public health adviser for the UK military. I currently work as a public health consultant and epidemiologist in independent practice.

I have taught, researched and published extensively, with over 70 peer-reviewed scientific papers, and chapters in standard scientific textbooks. I am a past examiner and current Fellow of the Faculty of Public Health Medicine of the Royal College of Physicians of London (FFPHM). I am currently a post-doctoral research fellow at Portsmouth University. I was for ten years (2008–2017) Editor-in-Chief of the scientific journal *Human Parasitic Diseases*, and Honorary Lecturer at Leicester de Montfort University.

I have acted in mediation disputes, and as a jointly-instructed expert. I have on five occasions acted as an invited expert adviser in Parliamentary inquiries. I have advised the General Medical Council, Nursing and Midwifery Council, UK Coroners' Service, Public Health England and UK regional police forces.

My areas of professional expertise
