Personal Profile

I am an enthusiastic, dedicated and accomplished Podiatric Surgeon, practicing at the forefront of the profession. I have pushed the boundaries of Podiatric Surgery and am considered by my peers to be a UK leader in the field. My passion for success has enabled me to build a solid reputation both locally and nationally across a number of medical specialties.

My practice is underpinned by my commitment to audit and research allowing innovation and excellence within my department. All surgical procedures undertaken are measured using validated PROMs and patient satisfaction scores facilitating the best pathways of care for the patient.

I believe my experience; reputation and leadership skills are transferable into the wider arena of multidisciplinary healthcare.

- Long term effect of electro surgery in the treatment of corns: British journal of Podiatry, 1999

Experience

I have 23 years' experience working in the NHS and have held a substantive consultant post for 14 years'. Throughout my career I have led by example, often helping others to achieve their goals. I have built a solid reputation in the field of foot surgery, undertaking and supervising 800 surgical procedures per year across the NHS and independent sector.

As a registered tutor and examiner I have supervised the training of a number of surgical trainees, as well as coaching trainees from around the country on exam preparation. I have provided training courses for other Podiatrists, and am currently planning a local anaesthetic course, which will generate income for the Trust.

In 2010 I had the opportunity to lead my profession as Dean of faculty, following election by my peers. This has provided me with invaluable experience in leadership and the ability to develop communication

skills across a range of professional boundaries. Quite often the role involved careful negotiation involving emotive issues with other professional stakeholders, which at times was extremely challenging. I fulfilled the role with a passion for success and have played a significant part in moving the profession forward.

Medico-legal

I am an associate of EWI and have undertaken medico-legal work, providing reports to the court and regulatory bodies.

Reports have been split 50/50 between claimant and defence.
