REGIONAL PRESENTATION

Total Hip Replacement in the UK; Does practice reflect guidelines?

Presented at the Northern Kreibich research session, Newcastle upon Tyne, November 2003.

Results: Key areas remain where there is a lack of consensus. These include consent, thromboprophylaxis, trainee supervision and discharge policy. Interestingly, the results suggest that around 30% of implants may not have a 10year NICE benchmark

Infection rate in adult Neurosurgical unit: Retrospective analysis of 501 patients. Associated factors, management, outcome and proposed modes of prevention.

Newcastle General Hospital, February 2002

Results: High rate of discitis, shunt and chest infection post-operatively, but results compare well with wound infection rate in the literature. Post-operative antibiotics show no benefit.

Analgesia for abdominal pain in Accident and Emergency Department; type, dose, route and timing of administration.

Sunderland Royal Hospital, Department of Accident and Emergency, August 2000.

Results: 70% of patients received appropriate analgesia within 2 hours of arrival to A/E.

Postoperative Transfusion Triggers – a prospective study, to evaluate transfusion criteria and up to date knowledge of transfusion medicine.

Ninewells Hospital, Dundee, PRHO Surgery, April, 1999.

Results: Poor knowledge of transfusion criteria among hospital doctors was noticed, leading to excessive use of blood transfusion services.

AUDIT PROJECT

Total Hip replacement in the UK – are guidelines reflected in practice?

The effect of prophylactic antibiotics on the rate of pacemaker pocket infection.

Fourth year medical school Audit project, June 1996.

Results: High rate of Pacemaker pocket infection was detected in patients who did not received prophylactic antibiotics.

Effect of early weight bearing on union rate following hindfoot arthrodesis: a retrospective study.

Hajipour L, Allen P E

Early weight bearing following hindfoot arthrodesis has no adverse effect on the union rate.

RESEARCH / AUDIT PROJECT IN PROGRESS

Prevalence of caudal equina and seasonal variation.

Usmaan Halim, Omar Alsawaf, Ladan Hajipour.
