## **ACADEMIC AMBITIONS;**

I was successful in creating a University Chair in Dermatology at ICSM on the CWH campus (2001) but this lapsed with the resignation of the appointee. The establishment of a University Department is still a major ambition and that was one of the reasons for my move to UCLH and UCL in 2010. In 2014 I secured ~£K650 from the Linbury Trust (Sainsbury Family Trusts) to establish an academic department of Gerontodermatology at UCL; unfortunately a suitable appointment was not achieved.

I was awarded a Personal Chair at Imperial College in 2005 and at University College in 2010.

I continue to press for academic developments in Dermatology at UCL and ICL and in the UK.

(i) to provide research opportunities for Dermatology trainees,

- ii) to augment British dermatological research output, currently disproportionate to populace morbidity and
- iii) to improve the curricular prominence of Dermatology, currently disproportionate to populace morbidity.

My personal research ambitions are to develop my interests in:

- i) Genital dermatology (lichen sclerosis, penile intraepithelial neoplasia, penis cancer)
- ii) Aetiopathogenesis, management and prognosis of thin melanoma
- iii) HIV related skin disease, including skin and genital cancer
- iv) Gerontodermatology
- v) Toxic epidermal necrolysis
