Summary

Charlotte has been a Consultant at the Royal London Hospital since February 2008. She has been practising Obstetrics and Gynaecology since 1992 and in addition to this training has been dual accredited as a subspecialist in Urogynaecology (pelvic floor dysfunction).

Charlotte has had extensive training and experience in obstetrics and gynaecology in busy district and central London teaching hospitals covering diverse multi-cultural populations. She works within one of the busiest high-risk labour wards in a teaching hospital in London.

Charlotte is Clinical Lead Uro-Gynaecologist for services across Barts Health NHS Trust which includes three gynaecology units as well as lead gynaecologist for the Royal London Hospital. This role involves governance, audit and guideline development across the three sites.

She runs a twice monthly colorectal clinic with her colorectal colleagues for combined faecal and urinary incontinence and operates jointly with these colleagues and plastic surgeons for major perineal reconstructions. This clinic is a national referral centre for patients with complex urogynaecology problems and for neuromodulation therapies.

Charlotte has on-call commitments for both obstetrics and acute gynaecology cases and supervises trainees in abdominal, laparoscopic and vaginal surgery.

She has a special interest in Urogynaecology which was established as a research fellow at St George's Hospital from 1996-1998. She gained subspecialty accreditation in Urogynaecology in 2006 and completed a senior fellowship in Uro-neurology in 2006-7. She has an MD thesis on risk factors for postpartum bowel and bladder trauma.

Charlotte has a strong commitment to teaching, training and recruitment in this specialty. She has been involved in the RCOG urogynaecology curriculum (STRATOG) and has sat on the board of the GMC qualifying examination for overseas doctors (PLAB) since 2008.

Medico-Legal work

Charlotte provides expert medico-legal evidence to British Courts.

Charlotte advises and gives evidence for both Claimants and Defendants in personal injury and clinical negligence actions. Her split of work presently is 80% for Claimants.

She has obtained the Bond Solon Cardiff University Expert Witness Certificate.

Private work Contact Details

Name	Charlotte CHALIHA
Address	59 Catherine Place, Westminster, London SW1E6DY.
Telephone	Tel:07951 500 330 (Mobile)
E-mail	cchaliha@googlemail.com
GMC Registration	3563775
Date of Birth	22 nd December 1967

Education

St Anne's College, Oxford (1986-1989)

- BA (Upper 2nd Class) Honours in Physiology – 1989
- Wellcome Foundation Bursary for undergraduate dissertation

Selwyn College, Cambridge (1989-1991)

- University of Cambridge MB BChir - 1991
- Selwyn College Prize for elective period report

Postgraduate Qualifications

- MRCOG – May 1999
- Accreditation in Colposcopy – July 2000
- MD thesis (University of London) – Nov 2000
- International Urogynaecology Association Research Prize – 2003
- Lindo Wing Fellowship Prize - 2005
- Subspecialty accreditation in Urogynaecology – 2006
- Certificate of completion of training- CCT (UK)- 2006
- Fellowship in Uro-neurology – 2006
- FRCOG - 2017

Employment

Current Post

Consultant in Obstetrics and Gynaecology, Royal London Hospital, since February 2008 with a sub-specialist interest in Urogynaecology.

In addition Charlotte has responsibility for a high-risk antenatal workload. The delivery suite encompasses a high proportion of ethnic minority patients, most of whom do not speak English and have specific social and cultural needs.

Charlotte has regular day-time delivery sessions per week and is on-call for both obstetrics and gynaecology.

Charlotte contributes to the risk management forum and guidelines development and runs the the gynaecology audit.

Private Practice

Charlotte consults at the St Johns and St Elizabeth Hospital in St John's Wood.

Clinical Experience - Gynaecology

- **Urogynaecology**
- **Investigative Urogynaecology**
- **Female and Reconstructive Urology**
- **Colorectal Surgery and Gastroenterology**
- **Community Continence Services**

In addition to the development of advanced surgical skills, Charlotte contributed to the following-

1. Obstetric pelvic floor clinics

2. Pelvic floor clinics for women with urinary and faecal incontinence:

3. Uro-Neurology

Operative Gynaecology

Charlotte is experienced in most major benign gynaecological procedures, including vaginal and abdominal hysterectomy, myomectomy for multiple fibroids, ovarian cystectomy and oophorectomy, colposuspension and sacrocolpopexy, all aspects of vaginal surgery including vaginal hysterectomy, pelvic floor repair, vaginal oophorectomy, insertion of mid-urethral vaginal tapes and sacrospinous ligament fixation

Teaching Experience

Charlotte's teaching activities include:

- Undergraduate OSCE teaching and tutorials.
- MRCOG OSCE training including publication of the Past Test MRCOG Part II Book(2003).
- Video teaching aids - Obstetrics emergency skills video – RCOG bookshop (2002)

- Urodynamics training for the RCOG special skills, Bristol Accreditation and University College Hospital courses. My recent candidate rating was 9.36/10.
- RCOG urodynamics lecturer- this is an annual course for urodynamic accreditation.
- Surgical skills – including direct supervision of fellow doctors in major gynaecological procedures.
- Perineal workshops for midwives and doctors including “hands-on” training in perineal and anal sphincter repair.
- Regular lectures for primary care physicians on a broad range of urogynaecology topics.
- Lectures for International workshops including 2007 All India branch RCOG meeting 2007.

Research Experience

Good quality research is essential for promoting progress in medical care. Working in the urogynaecology units at St George’s Hospital, St Mary’s Hospital and the National Hospital for Neurology & Neurosurgery Charlotte was involved in clinical research.

Charlotte has completed several differing research projects focusing on the efficacy of grafts in pelvic reconstructive surgery, urodynamic evaluation and the use of ultrasound to assess the pelvic floor. This includes a number of collaborative studies with other centres in the UK, Greece and Italy. In addition Charlotte has experience of participating in international multi-centre medical and surgical trials.

Charlotte has a strong interest in the effect of pregnancy and delivery on the pelvic floor and the resulting morbidity. Her research started in 1996 and was a clinical study leading to my MD Thesis entitled “The risk factors and causes of urinary and faecal incontinence before and after delivery” awarded by the University of London in 2000.
