Undergraduate

Honours in Anatomy

Honours in Biochemistry

Postgraduate

Best Undergraduate Trainer, University of Sheffield 2013

PRESENT CONSULTANT APPOINTMENT

(from 18/09/17 onwards)

Consultant Urological Surgeon,

Sheffield Teaching Hospitals NHS Foundation Trust,
Royal Hallamshire Hospital,
Glossop Road
Sheffield,
S10 2JF.

Sheffield Teaching Hospitals NHS Foundation Trust is one of the UK's largest and busiest Foundation Trusts. It is one of three major trauma centres for the Yorkshire and Humber region and is a tertiary referral centre for many urological problems, including stone disease. In addition, it works as a busy District General Hospital for the local population of Sheffield and surrounding area.

The Department of Urology comprises fourteen Consultant Urologists. All referrals for general urological conditions, including the initial management of urological cancers, are shared between consultant practices. My area of specialist clinical interest is endourology and the investigation and management of urological stone disease, including percutaneous nephrolithotomy (PCNL), extracorporeal shockwave lithotripsy (ESWL) and ureteroscopy (flexible and rigid).

I have undertaken a number of administrative and management roles during my Consultant career: Whilst at Chesterfield, I chaired the Surgical Division of the Audit Department from January 2000 to September 2001. I continue to have an interest in audit and as part of my annual appraisal process continue to audit the clinical outcomes of all endourological procedures I perform. From September 2001 I became chair of the Surgical Division of Clinical Governance. I very much enjoyed this role, but relinquished the post when I was appointed Associate Clinical Director for Urology & General Surgery in November 2002. Very soon after commencing this, the Clinical Director's position for Surgical Specialties became vacant and I was very much encouraged by the Trust to take on this role. I became Clinical Director for Surgical Specialties in Chesterfield from April 2003 until November 2006.

I was Chair of the Medical Staff Committee (MSC) in Chesterfield from 2008 to early 2013. We had bi-monthly meetings when we were able to discuss important issues with executive staff of the Trust.

In addition, I have an interest in medical education and training. I was undergraduate lead for surgical specialties in Chesterfield from 2005 to 2016 and I received an award for best undergraduate trainer from Sheffield University in July 2013.

I am a member of the faculty for national selection of urological trainees entering higher surgical training in urology.

I am an Examiner for the FRCS (UROL) examination. (Joint Committee on Intercollegiate Examinations).

I am an Assessor to the Royal College of Surgeons and regularly sit on national consultant urological surgeon appointment panels.

PREVIOUS CONSULTANT APPOINTMENT

(from 01/01/98 TO 17/09/17)

Consultant Urological Surgeon,

Chesterfield Royal Hospital NHS Foundation Trust,
Calow,
Chesterfield,
S44 5BL.

Chesterfield Royal Hospital is a busy District General Hospital comprising approximately 600 beds and opened progressively between 1984 and 1989.

The Department of Urology comprised four Consultant Urologists. All general urological conditions, including the management of urological cancer, were shared between the four consultant practices. My area of specialist clinical interest was endourology including the investigation and management of urological stone disease, including percutaneous nephrolithotomy (PCNL), extracorporeal shockwave lithotripsy (ESWL) and ureteroscopy (flexible and rigid).

Sheffield.
February 1992 to March 1992.

University Department of Surgery,
Royal Hallamshire Hospital,
Sheffield.
April 1992 - December 1992.

MEDICO-LEGAL EXPERIENCE/TRAINING

I have been a consultant urological surgeon for over 20 years. During this time I have committed myself to developing a first class urological service for my patients. I currently write approximately 40 to 50 medico-legal reports for both claimants and defendants (approximately 70:30) annually, both for clinical negligence and personal injury claims. I have experience of writing joint reports and attending Court when required.

I find this work stimulating, interesting and educational and continue to look to further develop my medico-legal practice. I have attended courses on writing medico-legal reports and writing reports in cases of alleged clinical negligence in 2011 and 2013, and with my extensive clinical experience, feel well equipped to produce good quality medical reports for the Court. I have completed CertMR Part 1 and have obtained Bond Solon Civil Procedure Rules for Expert Witnesses Certificate in 2013. I attended an advanced course run by Specialist Info on 'writing expert reports in clinical negligence cases' in November 2013.

MEDICO-LEGAL EXPERTISE

Uro-oncology

Prostate cancer

Bladder cancer

Kidney cancer

Urinary stone disease

-ESWL (lithotripsy)

-rigid and flexible ureteroscopy

-holmium lasertripsy

-percutaneous nephrolithotomy

Lower Urinary Tract Function

- prostate disease
- bladder dysfunction
- incontinence

Sexual function

- erectile dysfunction
- Peyronie's disease

Medico-legal Work

- personal injury
- medical negligence
