MANAGEMENT EXPERIENCE

1. Secretary of South African Paediatric Orthopaedic Society (2014 – 2018).
2. ABC Travelling Fellow Award, July 2014.
I was selected to represent South Africa with 6 other orthopaedic surgeons (From UK, Australia and New Zealand). We travelled to the East coast of North America giving presentations and learning from leaders in orthopaedics at eleven centres over a 5-week period in the United States of America and Canada. These eleven centres and their hosts included Atlanta (Emory University, Scott Boden), Miami (University of Miami Tissue Bank, Frank Eismont), Nashville (Van der Bilt University, Ginger Holt and Jonathan Schoenecker), Memphis (Campbell's Textbook headquarters, James Beatty, Terry Canale), Durham (Duke University, Ben Alman), Pittsburgh (University of Pittsburgh, Freddie Fu), New York (Hospital for Joint Diseases, Joe Zuckerman), Harvard (Harvard University, Harry Rubash, Tom Einhorn), Hamilton (McMaster University, Mohit Bandari, Michelle Ghert), Montreal (AOA, COA Conference) and Toronto (Toronto Academic Health Sciences Network, Albert Yee, Peter Ferguson). Through my fellow 2014 ABC colleague, Mr Prim Achan I was introduced to the Bart's Health Trust and thanks to him as an ambassador for this Trust and the orthopaedic family here, I am now working here. This fellowship gave an insight into training, management and leadership in North America. Evidence of University infrastructure and philanthropic Trusts showed how Research formed an integral part of their Healthcare model with collaboration between centres seen to be pivotal.

EXTRA ACTIVITIES**MEDICOLEGAL WORK**

I have extensive experience in the field of medico-legal work specifically in paediatric orthopaedic matters.

My areas of interest include cerebral palsy / neuromuscular quantum work, personal injury and negligence cases covering all general areas of paediatric orthopaedics and trauma related injuries in the field of paediatric orthopaedics.

I have acted as an Expert Witness in paediatric orthopaedics including negligence, and personal injury following trauma. Cases covered have been for both defendant and claimant.

I currently work in these fields of practice at the Royal London Hospital and cover all general orthopaedic cases in my day-to-day practice.

I commenced medico-legal work in 2012, shortly after returning from two international fellowships in paediatric orthopaedics. I have some court experience being called as an expert witness in the past.

I have undertaken basic expert witness training at the British Orthopaedic Association annual congress in Aberdeen in 2021 as well as much practical experience gained from mentors and other expert witnesses during Joint Report writing and informally over case discussions.
