Medico-Legal

I have experience in medico-legal reporting across England and Wales. I have experience in preparing clinical negligence reports for many hospital trusts.

I have completed over 40 clinical negligence reports of which 2 were on behalf of the claimant. I have attended 3 multidisciplinary case conferences.

I have been providing opinions on complex Clinical Negligence cases since 2018. I regularly attend medico-legal courses and training annually as part of my Continuous Professional Development (CPD) and I have successfully completed the Bond Solon Expert Witness Certificate in 2018.

Clinical Governance and Patient Safety

I was appointed as the Associate Medical Director for Quality and Safety in 2020 and I have also provided legal reports for the Emergency Department.

Through these roles, I have had broad exposure to patient safety incident investigation, coronial report writing and clinical negligence cases.
