Consultant Urological Surgeon

Nottingham City Hospital

Professional Summary

I have been a consultant urologist at Nottingham City Hospital since January 2009. I have a general urological practice and am a subspecialist in reconstructive urology, neurological bladder problems, incontinence (including post-prostatectomy incontinence), mesh removal surgery and female urology. My practice includes tertiary referrals from other urologists around the region particularly for management of complex incontinence problems.

I was head of service for urology at Nottingham University Hospitals NHS Trust between 2012 and 2019 and have been head of service for urology for Sherwood Forest Hospitals NHS Foundation Trust since 2020. I am a member of the BAUS section of Female Neurological and Urodynamic Urology and an examiner for the Royal College of Surgeons FRCS(Urol.) examination.

Medicolegal practice

I have been acting as a medicolegal expert since 2012, and currently write around 180 medicolegal reports per year, including both defence and claimant instructions. Around 55% of reports are written for the claimant. I accept instructions for both personal injury reports and clinical negligence reports.

I have expertise in general urology, neurological bladder dysfunction including cauda equina syndrome, incontinence, incontinence surgery, injuries to the urinary tract and urological reconstruction surgery. I also accept instructions for urological assessment after personal injury. I completed the MDU/RCSE Medicolegal course in September 2014.
