EXPERT WITNESS			
	IbixInsight LLP CCARHT CIC	Case Area	YEAR
<p><i>Commended Expert Witness reports</i> – with contemporary detail based on ongoing desk research (this is one of my areas of expertise in relation to contemporary judgements, legal advice, psychological impacts of grooming and abuse, rights of the child and international conventions and binding protocols) I have been the lead researcher on a number of international reports on the vulnerability of children within the legal system, the deployment of border controls and contraventions to cause considerable harm to children in the protection of their UN affirmed rights, and the consequent neglect of safeguarding and correct identification of risk and harm to the child, effectively engaged by traffickers to forestall upwards investigation of their networks at borders, and in domestic criminalisation of minors. I have published two significant reports on this particular challenge. I have developed a specialism in victimology, exploring a number of jurisdictions and cultural approaches and configurations of the ‘ideal victim’, and the consequent ambiguous relationship of trafficked victims to many state mechanisms of prosecuting the perpetrators of trafficking criminality</p> <p>In my counter trafficking portfolio responding to Asylum, trafficking and ‘return’ cases, I have developed a well-informed network advising on the realities and challenges of West and Central African Safe Housing provision, protective services, CSO capacities, I am well positioned to comment on the Psychological and socio economic, and state of the protective services support currently available in countries of return..</p>
