EXPERIENCE

I have worked in General Dental Practice in Fife for 37 years. Initially I worked as an associate and then became a partner and remained so for 28 years within the same multi location practice. After the practice was sold in 2018, I again worked as an associate for the corporate group that purchased the practice. Currently I am working as an associate with Clinical Director responsibilities in a mixed, mainly NHS practice in Glenrothes. For over 20 years I provided most of my treatments under NHS regulations and I now provide my patients with a wide range of restorative procedures and work closely with specialist colleagues on more complex cases.

Throughout my career I have gained extensive experience of providing dental care in a primary care setting and in a variety of roles.

I was a Vocational Trainer for 2 years and held a position as a Speciality Dentist at Dundee Dental Hospital and School where I mainly supervised undergraduate students on the restorative clinics.

Currently I am Dental Practice Advisor for Fife Health Board and am involved in strategy development and governance programmes. I also lead on the Practice Inspection programme for Fife.

I am a member of the Dentsply Sirona Restorative Key Opinion Leader Group for the UK and over the past few years have delivered a variety of presentations on a number of restorative topics including:

- Class 2 posterior composite solutions
- Root 2 crown assessment and restorative options
- Simplified aesthetic anterior composite restorations

I have provided post graduate courses for NES and NIMDTA and am currently developing online training options with a hands-on component with the team at NES.

I chaired the Fife Area Dental Committee and GDP Sub Committee for many years & sit on several clinical and governance committees in Fife.

I have always played a pro active role in terms of providing a viewpoint from a GDP perspective related to strategy and governance of Dental services. Over the years I have contributed to a number of committees including the Kirkcaldy and Levenmouth Community Health partnership and the Fife Area Clinical Forum.

In 2021 I was appointed as a Clinical Dental Adviser with the General Dental Council.
