Expert Trainer

My specialist area is based around the clinical aspect of various types of cancer (Breast, Prostate and Testicular) but I also undertake project work; the client outlines the task and expected outcomes and I will research the material, prepare, and deliver the presentation/trainings.

Consultant to various large corporate organisations

Most of the GE businesses, Ernst and Young (UK chain of Accountants) Coca Cola
Major projects include:

Breast Cancer Awareness
Prostate and Testicular Cancer Awareness

Clinical Product Training
Consultant to Kenyon International Emergency Services

Major projects include:
Establishing an Emergency Media Call Centre
Emergency Call Centre/Call Handling Management
Family Assistance

Setting up and managing a Call Centre for Next of Kin (Kuwait Airline)

Family Assistance Centre: easyJet airline

1993 – 2010:

Headhunted by one of the world's largest Healthcare companies – GE Healthcare undertaking numerous roles, most of these pan-European.

Subsequent promotion involved relocating to France to company headquarters These ensuing roles were in a Global capacity - Clinical Research and Development Manager, Education and Training Manager specialising in Breast Imaging, cancer research, and the future development of Imaging equipment and its related software's – This role involved structuring Education programmes for both internal colleagues (application

specialists/sales/service teams) and external customers. This involved creating e learning modules.

1977 – 1993:

Qualified as a clinical Radiographer with the UK NHS

Post qualification I worked in many different hospitals across the UK and the Isle of Man I spent some months establishing a working X -Ray department in a mission hospital in Tanzania as part of an NHS exchange programme.

I also undertook a further qualification in Mammography within the NHS Breast Screening programme (NHSBSP). I was subsequently promoted to Clinical Manager responsible for establishing the 1st screening programme for North Wales which gave me responsibility for 8 Mammographers, 2 Clinical Radiologists, and a cohort of administrative staff to ensure the successful breast screening of some 66,000 women on a 3 yearly basis.

Ongoing work 2004 – date:
