Clinical Experience

After graduating in 2008 I have completed foundation training, core surgical training and higher surgical training in Merseyside. I have also worked in Australia as well as visiting units in Cape Town, Fukushima, Baltimore and West Palm Beach to develop my specialist interest in limb reconstruction surgery. My practice encompasses general orthopaedics and trauma of the upper and lower limb in children and adults.

I have specific expertise in complex trauma, bone infection, non-union, post-traumatic arthritis, limb lengthening and limb reconstruction using internal and external devices, acquired and congenital deformity correction, congenital disease, skeletal dysplasia, metabolic bone disease.

I regularly attend national and international conferences and meetings to keep up to date with new developments in these fields and I am actively involved with education and research.

Medico-Legal Practice

I currently prepare specialist interest orthopaedic reports for complex trauma / limb reconstruction surgery / deformity / bone infection / paediatric orthopaedic cases. I do not accept instruction on soft tissue injuries, minor musculoskeletal trauma or spinal injury.

I have successfully completed the Cardiff University Bond Solon Certificate in Civil Law and have completed formal training as a medico-legal expert with Inspire Medilaw. I am registered with the Information Commissioner's Office have previously held accreditation with MedCo.

Approximate turnaround time for Personal Injury reports and Condition and Prognosis reports is 15-20 working days if all records and imaging are provided prior to the appointment. My full terms and conditions, CV and fee schedule are available on request.
