I am a General Practitioner with a wealth of knowledge and in depth understanding of the ambulance and urgent care sector. I work for Southwestern Ambulance Service NHS foundation Trust (SWASFT), leading the clinical governance and oversight of a multi professional workforce. I have extensive knowledge and understanding of the UK Urgent and Emergency Care system. With Specific understanding of the triage systems and process used by NHS ambulance Services, Urgent care systems and primary care.

I have significant clinical expertise in delivery of clinical care in Urgent Treatment Centres, General practice and out of hours services, regularly delivering clinical care in these areas. I have responsibility for the clinical governance of an Urgent Care Centre. I regularly undertake and oversee the clinical audit of triage calls and have expertise of using and implementing the RCGP urgent care audit tool kit.

I regularly work with the SWASFT legal team providing expert advice for complex clinical cases providing written evidence and attending coroner's court. I frequently review complaints and oversee investigations.

I have expertise in the developing systems to support the clinical oversight, assurance and learning, ensuring that we are operating safe and effective services for patients.

I have undertaken Bond Solon training having completed modules in Civil Law and procedure for the Expert Witnesses and Excellence in report writing. I have also undertaken formal training in the coronal process with experience of providing expert evidence in this setting.

Immediate – Past Roles

My roles have involved collaborating with various stakeholders to develop and refine urgent care pathways, ensuring that patients receive timely and appropriate care. I am also involved in training and mentoring junior doctors and other healthcare professionals, fostering a culture of continuous improvement and professional development. Throughout my career, I have been committed to improving patient outcomes and advancing the quality of care within the urgent and emergency care sector. My dedication to clinical excellence and patient safety has been the driving force behind my professional endeavours.
