Profile

Hazel Peet is an experienced and highly trained Registered General Nurse with over 17 years of NHS experience, including more than 13 years in senior clinical leadership roles. She specialises in gastroenterology, hepatology, urgent and primary care, and has developed extensive expertise in the management alcohol-use disorders (AuD).

Hazel holds a Master's degree in Advanced Clinical Practice with Distinction and is a qualified Non-Medical Prescriber with a broad prescribing scope, including controlled drugs and IV treatments. As an Advanced Clinical Practitioner, she is fully trained to assess, diagnose, treat, and discharge patients with undifferentiated and complex health needs, mirroring the clinical capacity of a medical doctor.

She was formerly Lead Nurse for the Acute Alcohol Service at the UK's largest NHS Trust and authored the Trust's guidelines for management of alcohol-use disorders, now adopted nationally. Her previous roles also include Advanced Clinical Practitioner within a Community Crisis Team and Service Lead for the Urgent Treatment Centre at Stepping Hill Hospital. She also played an integral part in the development of an ACP led rapid-access and diagnostics service

Specialisms:

Adults (18+)
Gastroenterology
Hepatology
Alcohol-Use Disorders
Urgent and Primary Care
Community Crisis Response
Rapid Diagnostics and Triage
Non-Medical Prescribing

Location:

Manchester

for patients with suspected cancer and was involved in a national project to develop end-of-life care pathways for patients with alcohol-related liver disease.

Hazel currently works in the primary care setting as an ACP in a busy city centre GP surgery. Alongside her clinical work, she undertakes expert witness work, including producing liability reports, contributing to joint statements, and giving evidence at inquest. Building on this established experience, she is now taking on a growing portfolio of medicolegal work. She is currently pursuing CQC registration to provide specialist alcohol services both within the NHS and privately.

Her key competencies include:

- Specialist care for patients with complex gastrointestinal and liver conditions
- Development of national-level protocols for alcohol-use disorder management
- Leadership and service development in secondary care, urgent care, and community settings
- Undertaking serious case and post-mortem care reviews
- Advanced diagnostics, prescribing, and treatment planning
- Acute and out-of-hours triage, telephone consultations, and remote care
- Experience in medico-legal reporting, joint statements, and inquest attendance
