Acquired Brain Injury
Spinal Cord Injury

Profile

With over two decades of experience in Occupational Therapy and Case Management, Minnieke specialises in neurological rehabilitation, acquired brain injury, spinal cord injury, and complex disability management. Beginning her career in South Africa, she gained hands-on experience working with children with cerebral palsy and adults requiring wheelchair assessments in resource-limited settings, developing a strong ability to problem-solve creatively.

Since moving to the UK in 2005, Minnieke has worked across diverse settings, gaining expertise in adaptations and equipment, stroke, spinal cord injuries, elderly care, and neurorehabilitation. She has held senior roles in community therapy, hospital-based rehabilitation, and acute neurology, where she honed her skills in complex decision-making, cognitive rehabilitation, mental capacity assessments, and multi-disciplinary leadership.

As a Case Manager at CCMS since 2016, she has managed clients with traumatic brain injuries, spinal cord injuries, and cerebral palsy, assisting with rehabilitation planning, litigation support, and transitional care. Her expertise extends to housing and manual

handling assessments, as well as specialist seating and adaptive equipment.

Now preparing Occupational Therapy and Care expert witness reports for the Court, she has completed the Cardiff University Bond Solon Expert Witness Certificate. Her extensive clinical and case management background enables her to provide well-rounded, detailed and evidence-based assessments and recommendations.
