Specialisms:

Musculoskeletal
Spinal Conditions
Amputations
Persistent Pain
Polytrauma

Location

East Midlands

Profile

I have 25 years' clinical experience as a Physiotherapist. I am highly experienced in general musculoskeletal and have a particular interest in spinal conditions and persistent pain. I currently work in independent physiotherapy practice and treat complex musculoskeletal and pain patients. I also work as a Clinical Case Manager for clients who have sustained catastrophic life changing injuries. I have a Master's degree in Physiotherapy which was predominantly focused on advanced clinical practice skills.

I have advanced practice and extended scope skills, including the prescription and management of medicines as a Non-Medical Prescriber, use of imaging and injection therapy.

I have been writing reports for the Court since 2017. I have obtained the Cardiff University Bond Solon Expert Witness Certificate. I am a member of the MLACP (Medicolegal Association of Chartered Physiotherapists) and I regularly attend courses and seminars to remain updated.

I am instructed in a mixture of quantum, condition & prognosis, and breach of duty reports.
