Summary

I am a Consultant Clinical Neuropsychologist, registered with the Health and Care Professions Council (HCPC). I am a Chartered Member of the British Psychological Society (BPS), a full member of the Division of Clinical Neuropsychology, and listed on the **UK Specialist Register of Clinical Neuropsychologists (SRCN), recognised as the gold standard for neuropsychology practice in the UK.**

My clinical expertise centres on working with individuals with **traumatic and other forms of acquired brain injury, as well as a wide range of neurological conditions** including epilepsy, brain tumours, multiple sclerosis, encephalitis, and various forms of dementia. I provide specialist neuropsychological assessment using a broad range of psychometric tools, to evaluate the effects of neurological illness on cognitive functioning and emotional wellbeing, support diagnosis, monitor change, and/or inform care planning. Additionally, I provide evidence-based neurorehabilitation and psychotherapeutic interventions, delivered one-on-one or as part of a multidisciplinary team.

I have worked across various inpatient, outpatient, and community neuropsychology services within both the NHS and independent sector. Between 2018 and 2024, I was employed at King's College Hospital London, working across specialist neuropsychology and neurorehabilitation settings. From 2024 to early 2026, I practised as a Consultant at Cleveland Clinic London, where I helped establishing an outpatient neuropsychology clinic providing diagnostic neuropsychological assessments and interventions. Alongside my appointments, since 2019, I have also run an independent practice, working with **both litigating and non-litigating clients** in the community. I now practise exclusively on an independent basis. I have a particular interest in mental capacity, and since 2020, I have been a **Special Medical Visitor to the Office of the Public Guardian and the Court of Protection**, regularly conducting **independent mental capacity assessments** to support them in their roles, and completing 20-30 assessments per year for them.

I maintain regular supervision and ongoing continuing professional development in accordance with HCPC and BPS standards of practice and have completed **Bond Solon training on expert witness report writing.**

Alongside my clinical practice, I regularly lecture on neuropsychology-related topics and have published peer-reviewed articles focusing on brain injury, cognitive impairment, and their impact on behaviour and everyday functioning. I maintain active involvement in research, including for instance current participation in a standardisation and norming study for newly developed neuropsychological assessment measures.

Professional Experience

Consultant Clinical Neuropsychologist

Private practice

Part-time

2019 – current

Special Medical Visitor

Office of Public Guardian and Court of Protection

Part-time

2020 – current

Professional Memberships

- BPS Specialist Register of Clinical Neuropsychologists (SRCN)
- British Psychological Society (chartered status) and Division of Neuropsychology
- Expert Witness Institute ('Affiliate' member)
- HCPC registered (PYL36297)

Training

- 'Excellence in Report Writing' training day, delivered by Bond Solon 2025
- Attendance of the annual Court of Protection Special Visitors conference/training day 2020-ongoing
- Mindfulness-Based Cognitive Therapy Programme for IoPPN DCLinPsy trainees 2017
- 13th Annual Course in Neuroradiology and Functional Neuroanatomy (UCL) 2013

Additional Information

- I am currently collaborating on a freelance basis with the Pearson UK research team on validation and norming studies for two novel neuropsychological assessment batteries
- I am bilingual (Italian and English) and have experience working with interpreters
- Enhanced DBS clearance
- Clean driver's license
