Summary

I am a Consultant Podiatric Surgeon with over 25 years' experience in podiatry and foot and ankle medicine and surgery, including more than 10 years at consultant level across NHS and private practice.

My medico-legal practice includes clinical negligence, personal injury, and condition and prognosis matters concerning podiatric surgery and foot and ankle conditions. I provide independent opinion on standards of care, diagnosis and treatment pathways, surgical indications, consent and risk communication, delayed diagnosis or referral, post-operative complications, causation, functional outcome and prognosis.

My clinical expertise includes elective and revision foot surgery, traumatic foot and ankle injury, diabetic foot disease, limb salvage, infection, delayed wound healing, multidisciplinary care and complex surgical decision-making. My operative experience includes forefoot and midfoot surgery, selected hindfoot surgery, minimally invasive surgery and diabetic limb salvage, with extensive surgical experience across NHS and private practice.

I am a Past National Dean of Podiatric Surgery at the Royal College of Podiatry and Adjunct Assistant Professor of Medical Sciences at Quinnipiac University, USA. I remain clinically active and work as an educator, examiner and professional leader, with involvement in clinical governance, professional standards, research and postgraduate education.

I completed all modules of the Cardiff University Bond Solon Civil Expert Witness Certificate programme in 2026. My training includes expert report writing, courtroom skills, witness familiarisation, cross-examination, and civil law and procedure. I undertake medico-legal work only within my defined field of expertise and provide independent, objective and evidence-based opinion in accordance with my overriding duty to the Court.

Areas of Clinical Expertise Relevant to Medico-Legal Work

- Podiatric surgery and foot and ankle conditions
- Clinical negligence, breach of duty and causation
- Personal injury, condition and prognosis
- Elective and revision foot surgery
- Forefoot and midfoot pathology and surgery
