Employment History

Portfolio GP

February 2016 - present

Working across a range of roles including:

Thrive

October 2018 - present

Working remotely reviewing and giving patients feedback on blood results they have ordered directly. Commenting on a lifestyle questionnaire to recommend healthy changes that may be impactful on terms of results and overall health.

Christchurch Hall Surgery, London, N8.

September 2016 – present

Reasonably affluent part of London. Combination of book on day 15 minute emergency appointments and advanced bookings. Cover for single handed partner when on holiday including all incoming enquiries, prescriptions and documents.

Babylon Healthcare

October 2017 – Aug 2018

Working remotely for Babylon private arm. Working in 4 hour sessions, consulting with patients either by telephone or video.

Mildmay Medical Centre, London, N16

March 2016- Aug 2018

Mix of booked and emergency 10 minute appointments in a socially deprived area of London. Often cover telephone triage for the day. Also doing repeat prescriptions and incoming documents. (9.5 hours/week average)

Elsevier AI tester

April- May 2018

Commissioned work to test Elsevier's online symptom checker. Worked from home devising clinical scenarios and ensuring online checker secured correct clinical outcome. Critiquing process and options offered, feeding back to Elsevier commissioners.

| • General medicine/Diabetes | Dec 2010-Apr 2011 |
| • Vascular/General Surgery | Apr 2011-Aug 2011 |
| • GP | Aug 2011-Dec 2011 |
| • Acute Medicine | Dec 2011-Apr 2012 |
| • Psychiatry | Apr 2012-Aug2012 |

Current Roles

I am a portfolio GP in a variety of roles, including GP, OOH and private healthcare and I am the resident GP for several National Newspapers and Magazines where I advise readers on a varied range of medical topics currently in the news.

I am the resident GP Talk TV London and host a weekly show taking listeners calls on any medical topic on which they have a question.

I am a well rounded GP experienced in all body symptoms and disease processes. I have a special interest in Women's Health, particularly fertility and menopause. I have completed the DFSRH.

I have served as a NICE Guideline committee member (Thyroid disease) and as such, I am skilled at using critical appraisal skills to apply critical analysis to medical timelines, application and adherence to guidance and good practice.

Skills and personal qualities

I have been interested in Medicolegal work for some time, actively reading cases and exploring the field. I have several friends who are either lawyers or doctors working in the field who have shared valuable insights and guidance in my preparation to take on work. I have reached a point where I feel my breadth of caseload and experience has developed to the point of being ready and able to take on work to a level of excellence.

I have completed the **Cardiff University Bond Solon (CUBS) Expert Witness Certificate** and examined a case which was complex and tested all skills required for this work.

I regularly attend courses or updates to keep my knowledge fresh and relevant. For example.

I feel that I am completely ready to take on case work in the medicolegal arena.
